About Me

I am a specialist who combines design, development, and modern technologies. My strength lies in my ability to work at the intersection of different fields:

- UI/UX design — I create user-friendly and aesthetically pleasing interfaces.
- Frontend and WordPress — I develop responsive websites and optimise them for business tasks.
- Flutter — I create mobile applications with a native experience for iOS and Android.
- 3D modelling — I visualise ideas and turn them into realistic models.

Education

Vladlen Minin

Front-End Development
October 2024

Disarto

UI/UX Design & Figma
November 2021

ITDoctor

Frontend Development
December 2022

Udemy

FrontEnd Development
September 2025

Udemy
